

This fun craft uses
only 4 ingredients!

What you will need

- 1/2 cup Elmer's GLUE-ALL Glue
- 1 1/2 cups Shaving Cream
- 2 1/2 TB Contact Saline Solution with Boric Acid
- Food Coloring
- Medium Sized Bowl
- Stirring Tool

Let's Get Creative!

- 1** Measure out your glue and add to a bowl.
- 2** Add a few drops of food coloring. The more you add, the darker the color will be. Mix well.
- 3** Measure out the shaving cream, then add to the bowl. Stir to combine.
- 4** Measure out and add the contact solution a little bit at a time.
- 5** Stir the mixture until it doesn't stick to the edge of the bowl anymore. It should start to clump together and form a ball.
- 6** Knead the slime with your hands well. If the slime is still too sticky, add a little more contact solution and work it in.
